Step 3 of the suggested method would not apply to this problem since there are no forces directed "at angles" (that is, all the forces are either horizontally or vertically directed). Step 4 of the suggested method involves the determination of any known forces. In this case, the force of gravity can be determined from the equation  $F_{\text{grav}} = m \cdot g$ . Using a  $g$  value of  $9.8 \text{ m/s}^2$ , the force of ...

HISTORY OF AMUSEMENT PARK PHTYSICS An amusement park may not seem at first the ideal place for a study of physics. There are notable disadvantages, such as the money and time involved in bringing 30 kids to the park, as well as logistic problems. Some people feel it supports a "goof-off" image of physics. However, for
