procedure. Learn about possible side effects...

Gallbladder Removal Surgery: Side Effects and Complications

The most common reason for gallbladder removal surgery is to treat gallstones. With laparoscopic surgery, patients are usually able to leave the hospital the same day as the procedure and be back to normal in as

Access Free Atlas Of Surgery

littel as two weeks.

With open surgery, patients typically stay in the hospital for 1 to 2 days. It may take 6 to 8 weeks for a full recovery.

How Long Is the Recovery from Gallbladder Surgery?

The gallbladder is a pear-shaped sac that measures around 7 to 10 cm long, with an average capacity of 30

The gallbladder wall is composed of a number of layers. The gallbladder wall's innermost surface is lined by a single layer of columnar cells with a brush border of microvilli, very similar to intestinal absorptive cells. Underneath the epithelium is an underlying lamina propria, a muscular layer, an outer perimuscular layer and serosa. Unlike
