Answer

type B is dominant, the baby most likely has type B blood, unless the parent with type B blood also has an allele (form of a gene) for O blood (BO in the Punnett Square). If this is the case, there is the possibility that the baby has type O blood. Thanks!

How to Determine Your Baby's Blood Type Using a Punnett Square

Bookmark File PDF Blood Type And Advanced

The blood type inheritance makes a good example of a trait that is perfect to use in the Punnett square calculator. The height of a child cannot be predicted using the Punnett square method - there are too many variables and genes affecting this trait. Traits are inherited through genes, the memory banks of the cell.
