Define Solution

Chemistry

is a special type of homogeneous mixture composed of two or more substances. In such a mixture, a solute is a substance dissolved in another substance, known as a solvent. The mixing process of a solution happens at a scale where the effects of chemical polarity are involved, resulting in interactions that are specific to solvation.

Solution - Wikipedia

What is a Solution?

What is a solution?

Solutions are a homogeneous mixture of two or more substances. It has homogeneity at the particle level. Usually, people think of it as some liquid with either a solid or a liquid or a gas dissolved in it. However, this is not entirely true.
