Electronic power steering system-It is the latest type of power steering system in which the hydraulic system from the hydraulic power steering is completely replaced with electric motors and electric sensors, instead of using hydraulic force ,the motor driven by the vehicle's battery is used to apply force on the steering gear and torque provided by the motor is controlled by the sensors ...

How Power Steering System Works? - Best Explanation ...

Hydraulic power steering systems work by using a hydraulic system to multiply force applied to the steering wheel inputs to the vehicle's steered (usually front) road wheels. The hydraulic pressure typically comes from a gerotor or rotary vane pump driven by the vehicle's engine. A double-acting hydraulic cylinder applies a force to the steering gear, which in turn steers the roadwheels.

Power steering - Wikipedia
