Bob, Glen, and Paul are once again sitting around enjoying their nice, cold glasses of iced cappuccino when one of their students asks them to come up with solutions to the differential equation $y+1 \, dy = . \, dt \, t +1$ After much discussion, Bob says $y(t) = t$, Glen says $y(t) = 2t + 1$, and Paul says $y(t) = t^2 - 2$.

Differential Equations - SILO.PUB

Students learn how differential equations are formulated and interpret their meaning to applied models. A three-pronged qualitative, numeric, and analytic approach stresses how to visualize differential equations geometrically, use technology to investigate the behavior of solutions, and predict the behavior of solutions as they apply to models.
