Disaster Risk Reduction - World | ReliefWeb

Disaster risk reduction is a systematic approach to identifying, assessing and reducing the risks of disaster. It aims to reduce socio-economic vulnerabilities to disaster as well as dealing with the environmental and other hazards that trigger them. Here it has been strongly influenced by the mass of research on vulnerability that has appeared in print since the mid-1970s. It is the responsibility of development and relief agencies alike. It should be an integral part of the way such organizati

Disaster risk reduction - Wikipedia

Introduction: The Department of Education of the Philippines implements one of the provisions of the Philippine disaster risk reduction and management act of 2010 (DRRM Act) to integrate DRRM in the school curriculum and other educational programs, and to heighten the level of resiliency of students toward natural disasters. Hence, this study was conducted to assess the disaster-related ...
