Environmental considerations of human displacement in Liberia A guide for decision-makers and practitioners This report of the United Nations Environment Programme was made possible by the generous contributions of the Governments of Norway and Sweden

OW TO USE THIS GUIDE - United Nations Environment Programme

Why environmental issues matter to refugees and UNHCR. Climate change and natural disasters can add to and worsen the threats that force people to flee across international borders. The interplay between climate, conflict, poverty and persecution greatly increases the complexity of refugee emergencies.

UNHCR - Climate change and displacement

Given that considerable numbers of people are currently being physically relocated within the country, further environmental impact is probably inevitable (1.3, Population Displacement and the...

A third area where climate change is expected to result in increased displacement is the area of so-called slow-onset disaster in which climate change has specific long-term environmental effects...

Displacement, Natural Disasters, and Human Rights

In legal and policy circles it is sometimes seen as desirable to distinguish between those displaced by 'human' causes, such as conflict and violence, and those displaced by 'natural' causes, such as environmental hazards and disasters. As the above examples illustrate, however, the reality of displacement is often far more complex.

Human vs 'natural' causes of displacement: the ...

Environmentally displaced person refers to "persons who are displaced within their country of habitual residence or who have crossed an international border and for whom environmental degradation, deterioration or destruction is a major cause of their displacement, although not necessarily the sole one" (IOM, 2011:34 in IOM, 2014:13).

Data and statistics on Environmental migration

A conceptual framework for migration and environment • Human migration is potentially influenced by environmental factors, but ultimately shaped by a complexity of forces including social, economic...

Migration, Displacement and Climate Change

human mobility to climate change is extremely difficult: people move for a wide variety of reasons, and even where hazards contribute to this decision, it is the underlying socioeconomic, cultural, political and environmental processes that either enable or constrain people's ability to cope where they are or result in them moving.

Climate change, migration and displacement

between environmental degradation and population displacement. Implicit in these writings is the belief that environmental degradation - as a possible cause of population displacement- can be separated from other social, economic or political causes.

Vulnerability and Climate Change Induced Human Displacement

The spontaneous movement and displacement of large numbers of people may have significant impacts on the environment. Arriving in an alien situation, refugees face hunger, fatigue, humiliation and grief. Their first concern is to look after themselves, most often to find food and shelter.

UNHCR - Refugees and the Environment

Myers argued that the causes of environmental displacement would include desertification, lack of water, salination of irrigated
