Bill of quantities (BQ or BOQ) is prepared by the client's quantity surveyor or cost manager. The quantities are measured in number, length, area, volume, weight or time. BOQ helps to contractors get an itemized list of materials, equipment, and labour (with their costs) required to build new projects, maintain, or repair existing structures.

Measurements are always characterized by uncertainty. Whether because of the possibility of instrument drift, the need to interpolate visually an instrument scale, or the difficulty of defining exactly what we wish to measure, we are never certain that the value of what we have measured is the "true" value of what we intended to measure.
