### Xanax and Alcohol / Food Interactions - Drugs.com

Drug-drug interactions occur when two or more drugs react with each other, causing an unexpected side effect. For example, mixing a drug you take to help you sleep (a sedative) and a drug you take for allergies (an antihistamine) can slow your reactions and make driving a car or operating machinery dangerous.

### Medication Interactions: Food, Supplements and Other Drugs ...

How drug interactions happen. The term "drug interactions" is somewhat misleading. Drugs don't combine in the body to produce chemical reactions. Instead, a drug, supplement, or food may affect how long a medication stays in the body, often by stimulating or inhibiting the production of specific enzymes in the liver or intestine.
