When you are taking an exam, you need to be able to retrieve learned information from your memory in order to answer the test questions. There are four basic ways in which information can be pulled from long-term memory. The type of retrieval cues that are available can have an impact on how information is retrieved.

How Information Retrieval From Memory Works

The SATs reading test will ask you to read and answer questions about three different texts. These texts will be varied, they could be fictional, factual or poetry. Retrieval questions come in different forms and will often begin with: 'who, what, where, when, why or how.'
