Inherit The Stars Giants 1

James P. Hogan's Inherit the Stars deserves its status as a science fiction classic. The book is set in the mid-21st century. In the first chapter, a 50,000 year-old human skeleton dressed in a spacesuit is found on the moon. The inescapable conclusion is that a technologically-advanced race of humans existed 50 millenia ago.

James P Hogan Inherit The Stars Epub Download

This is the third of the Giants novels, after Inherit the Stars and The Gentle Giants of Ganymede. In the first novel, a body is found inside a space suit on the moon--and turns out to be 50 thousand years old. Later, on Ganymede, is found a derelict alien ship, with the remains of alien giants--and it turns out to be 25 million years old.

In an exoplanetary first, astronomers have directly imaged two giant planets orbiting a star that's a virtual twin of the Sun — though much younger. The star is called TYC 8998-760-1 (after its ID number in the Tycho catalog), and it's about 310 light years away in the constellation of Musca.It's part of a group of stars all born together called the Scorpius-Centaurus Association ...
