ISO 14644-3:2019 is the second edition of the standard devoted to cleanroom and associated controlled environment tests, and it revises the 2005 version of the same international standard. Notably, Clause B.7, "Installed filter system leakage test," was simplified, as there previously were concerns over its complexity.

ISO 14644-3, published by ISO in August 2019, updates "textbook" guidance that has been in use since 2005. Performance tests are specified for two types of cleanrooms (unidirectional and non-unidirectional) in three occupancy states (as-built, at-rest, and operational).

**ISO Standard 14644-3, Test Methods**  
The ISO 14644-3 standard provides two methods for calculating cleanroom recovery performance, The 100:1 recovery time method is simply a direct measurement of the time required for the cleanroom to recover from an aerosol challenge 100 times the Target Cleanliness Level. In the example here the recovery time was 12 minutes.
