We are building two mini jet boats to run in super skinny water up here in Alaska. Access to so many areas with shallow water is normally done with air boats and hovercraft. The mini's are now a high performance option for us up here. Problem is most parts have to be custom built or bought from New Zealand or Canada.

MotoJet was created to provide a new experience in jet boating - to explore and navigate smaller rivers and streams that have not been accessible. The developer of MotoJet, Doug Riddle, former owner of Weldcraft and Riddle Marine, has been in the boat manufacturing industry since 1978. Riddle brings an immense amount of knowledge and experience to the design and manufacturing of each custom-built MotoJet.

MotoJet USA | Aluminum Boats

The design concept consists of a bow with little buoyancy, a hull that slopes inward from the waterline and, ergo, a large reduction in wave-making resistance. While it works well in heavy seas, the drawbacks include reduced interior volume forward and a very wet ride because the waves come up and over the bow as a matter of course.
