A stochastic process is defined as a collection of random variables defined on a common probability space  $(\Omega, \mathcal{F}, P)$ , where  $\Omega$  is a sample space,  $\mathcal{F}$  is a  $\sigma$ -algebra, and  $P$  is a probability measure; and the random variables, indexed by some set  $T$ , all take values in the same mathematical space  $S$ , which must be measurable with respect to some  $\sigma$ -algebra  $\mathcal{B}$  on  $S$ .
