Sail And Rig Tuning

Fortunately, rig tuning is a straightforward step by step process for both masthead and fractional rigs. The goals in rig tuning are the following: (1) Eliminate side bend and lean, (2) Set mast rake for proper helm balance, (3) Set pre-bend to match the mainsail design, and (4) Control mast bend and headstay sag.

How to Tune Your Rig | North Sails

This book does an outstanding job of condensing the rather large topic of sail trim (and rig tuning) into one concise, illustrated book. It covers foresails, the mainsail, and spinnakers, and always describes the whys, not just the what-todos. I highly recommend it to sailors that are from intermediate to doesn't-quite-know-it-all.
