School Health Services And Healthful

School health services staff can help all students with preventive care such as flu shots and vision and hearing screening, as well as acute and emergency care. Qualified professionals such as school nurses, nurse practitioners, dentists, health educators, physicians, physician assistants and allied health personnel provide these services.

School Health Services | Healthy Schools | CDC

School health services can be a rich source of data for studying the relation between health status and learning capacity, and for assessing unmet needs and monitoring the health status of children and adolescents. Given the above needs and benefits, a basic health services program must be in place in all schools.
