how do you reset a white rogers 50A50-241 I had a buddy of

An HVAC tech has diagnosed my heating problem as a bad White Rodgers 50A50-206 control board. I understand that the replacement for this older model is the 50A55-843. Comparing the two boards it looks like most of the wiring matches up except the IND IGN wires. On the 206 board it is a

two wire plug. On the 843 it is a 4 wire plug.

50A55-843 - White Rogers Ignition Module

I replaced a White-Rodgers 50A50-206 controller with a White-Rodgers 50A55-843 Universal Controller. The furnace turns on runs for about 2 minutes, shuts off and then starts up again. This continues for about half an hour at which time the controller locks out.
