So, bearing in mind you require the books swiftly, you can straight acquire it. It's for that reason unconditionally simple and as a result fats, isn't it? You have to favor to in this ventilate

Wikibooks is an open collection of (mostly) textbooks. Subjects range from Computing to Languages to Science; you can see all that Wikibooks has to offer in Books by Subject. Be sure to check out the Featured Books section, which highlights free books that the Wikibooks community at large believes to be "the best of what Wikibooks has to offer, and should inspire people to improve the quality of other books."

## Witte Engines

The Witte Iron Works was a maker of hit and miss engines. The company was started in 1870 by August Witte in Kansas City. His son Ed Witte built the company's first crude gasoline engine in 1886. In 1894 gas engines would be the company's primary focus. They made the Witte's Junior Headless engine, Witte portables, and a Dragsaw. In 1911 they started manufacturing the Simplicity line of engines.

In 1937, Witte introduced some all new vertical diesel engines with a 3.5 x 4.5-inch bore and stroke (43.3 ci). Initially, the output was 3 hp at 1200 rpm and a direct-drive generator produced 1600 watts AC or DC early on and later could make 3 kw. In 1937, these cost around \$600 and had a built-on radiator.

Having remembered someone calling the engine 'The Witte,' I eagerly looked through the book for maybe a picture or description of one. Sure enough, I found a picture that looked just like what I remembered from my boyhood about the Witte engine. Since then I've learned that that engine, in all likelihood, was a 4 HP Witte headless on skids.

### **My Old Witte Engine**

This is a brief page about a very effective battery charger I built from an old Witte log saw engine. This type of engine is often referred to as a "stationary" gas engine, most of them were built between 1900 and 1940. Unfortunately most of them were melted down for their cast iron during World War 2. Although I am unsure, I believe this to be a 1.5 horsepower engine, and it is a good match for a Delco alternator with a 14" pulley!
